

Export of data from Scandiatransplant

Scandiatransplant is governed by the 10 hospitals in the Nordic countries, where organ transplantations are performed and they accordingly own their data.

The guidelines for receiving data from Scandiatransplant are as follows.

Referable data

1. Data requests concerning one specific transplant hospital

- Scandiatransplant users and the chief physician in charge of transplantation in a department have full access to their own data.

- Others need written approval from the chief physician in charge before they can get data. Data requests on more than one organ type must accordingly have written approval from all chief physician involved.

2. Data requests concerning a whole country on one organ type

written approval needed from the reference groups' chairman or national key person before exporting data.

3. Data requests concerning a whole country on more than one organ type

can only be exported after consultation with the countries Scandiatransplant board member.

4. Data requests concerning all Scandiatransplant centers on one organ type

written approval needed from the reference groups' chairman before exporting data.

5. Data requests concerning all Scandiatransplant centers on more than one organ type

can only be given after consultation with the chairman of the board.

Not referable data

6. Numerical data, which cannot be referred to any specific recipient, donor or center, can be exported after assessment by the medical director .

7. Any data that are or will appear on the home page can be exported without further notice.
