

Rules for exchange of kidneys from deceased donor within the Scandiatransplant cooperation 2006

As decided by the Council of Representatives of the Scandiatransplant association,
Gothenburg, May 10, 2006.

By existing HLA compatibility at least one kidney per deceased kidney donor must be applied for transplantation of a recipient on the Scandiatransplant waiting list according to the below-mentioned rules in order of priority: (However, this applies only if both kidneys from a deceased donor are applicable for transplantations)

- 1. Highly immunized (PRA \geq 80%) patients who are HLA-A,-B,-DR compatible with donor.*
- 2. Immunized patients (PRA \geq 10% but below 80%) who are HLA,A,B,DR compatible with donor.*
- 3. Patients who are HLA-A,-B,-DR compatible with donor.*
- 4. If organ donor is <40 years of age, at least one kidney is offered to recipient <16 years of age (counted from time of registration), if there is HLA-DR compatibility and in addition not more than 2 HLA-A,B mismatches.*

Re PRA:

(Panel reactive antibodies): PRA activity based on screening towards B-cells is ascribed the same importance as PRA activity based on screening towards T-cells.

Re HLA compatibility:

By HLA compatibility is meant 0 (zero) demonstrated HLA mismatch between donor and recipient as regards "broad HLA-A,-B specificities", HLA-Bw4/Bw6, and the HLA-DR antigens DR1-14.

ABO blood groups:

Kidneys of blood group 0 shall only be offered to patients with blood group 0. Kidneys of blood group B shall only be offered to patients with blood group B.

Return obligation:

Kidneys, which are exchanged on basis of above-mentioned criterions must be "paid back", and the return is aimed at being effected within six months, and if possible by a kidney of the same blood group as the one received. The organ offered in this way must be of a quality acceptable to the recipient center, regarding for instance technical quality, donor age and time of ischaemia.

Return obligation does not comprise kidneys which are exchanged for other reasons than the above-mentioned obligatory exchange rules.
