

STAMP committee meeting, 30-10-2023, virtual Teams meeting

Participants:

Mats Bengtsson
Kristian Heldal
Bjarne Møller
Søren Schwartz Sørensen
Jouni Lauronen
Ilkka Helanterä
Kaie Lokk
Margret Andresdottir

Decision Minutes:

1. We will present the suggestion to NKG of further analysis of the 86 patients assigned to STAMP but transplanted outside STAMP.
We will ask each center to answer the following questions for each of the STAMP-nonSTAMP patients:
 - 1.1. At time of transplantation were there actual or just historical DSA?
 - 1.2. What were the specificities and MFI of DSA
 - 1.3. Were any desensitization performed before transplantation if so what protocol
 - 1.4. Induction agent (Basiliximab/thymo/IVIG/rituximab
 - 1.5. One year after transplantation:
 - 1.5.1. Is the graft still functioning
 - 1.5.2. P-creatinine and eGFR after 1 year
 - 1.5.3. Rejection episodes (date, Banff grade (AMR/TCMR)
2. Mats will look into some of the present STAMP patients with TS score 0.0 and evaluate if delisting of some of the antigens seems possible and how this would affect TS score. Mats will contact Ilse Weinreich from SCTP to get the necessary data
3. We plan for a virtual STAMP meeting in January 2024 where the data from points 1 and 2 hopefully will be available for discussion
4. We plan for a face-to-face STAMP meeting during the STS meeting in Aarhus 30-31 May 2024

30-10-23
