Warning before organ offers are sent

New pop-up warning

With the update today, a warning message has been introduced, when you are trying to send out an organ offer.

So, if you didn't intend to send out the offer, you are now able to abandon the process.

New payback reports

November 2017 the new liver and kidney payback overview, was introduced in YASWA. In relation with this two new reports have been launched today.

You can now extract payback status information

DD – Payback balance

Gives you an overview in XY-format, with selected parameters

PAYBACK BALANCE
Waiting list: KI; Donation date 01-Jan-2018 - 12-Apr-2018; Payback status: All

		Credit (payback to center)										Total
		AR	CP	GO	HE	ML	OD	OS	ST	TA	UP	
Owe (organ to center)	AR								1			1
	CP				1							1
	GO							1				1
	HE									1		1
	ML	1		1								2
	OD		1									1
	OS										1	1
	ST								1			1
	TA											
	UP				1							1
	Total	1	1	2	1			2	1	1	1	10

DD – Payback information

Gives you raw-data in Excel on payback in relation to your own center including refusals and number of days until payback

New quality control

'Patient - Last urgency code NT before patient is transplanted' displays all patients that were withdrawn as transplanted with status 'Not transplantable'.

This might make sense for living donor transplantations, as they don't need to be active on waiting list. However it doesn't make sense heart transplants, deceased kidney donor transplantations etc.

Introduction of new QC to improve data quality

Scandianumber	Treatment type	Entry on waiting list	First name	Surname	Transplantation center	Tx date
