## Updates in existing YASWA modules

'Living kidney donor Basic' weight, BMI and ABO moved + additional parameter in query

Body weight and BMI calculation has been moved from 'Baseline risk factors' to 'Preoperative data' tab, so they are now found together with information on height.

**Fields in 'Living donor basic' has been moved around**

Living donor information

Donor number:  Person number:

Sex: F: Female Age in years at donation: 73

Surname:

First name:

First regist.:  27-Jun-2016 Last Change:  27-Jun-2016

Basic information Preoperative data Infection serology HLA Typing Baseline risk factors Kidney function Donor operation Postoperative data

Height: 170 cm Body weight: 65.0 kg BMI: 22.49 kg/m²

To make room for this change ABO blood group has been moved to the initial 'Basic information' tab.

Living donor information

Donor number:  Person number:

Sex: F: Female Age in years at donation: 73

Surname:

First name:

First regist.:  27-Jun-2016 Last Change:  27-Jun-2016

Basic information Preoperative data Infection serology HLA Typing Baseline risk factors Kidney function Donor operation Postoperative data

Country: DK: Denmark Tx-center: CP: København

Local hospital:  ABO blood group: A

Relation information

Furthermore 'Date of donation' has been added as a search parameter, which makes it possible to bring forward donors for a specified period.

**Search on 'Date of donation'**

Living kidney donor basic

[Enter search parameters]

Donor number:  Person number:

Sex:  Date of donations: 01-Jan-2016 - 30-Jun-2016 Age at donation ≥  <  years

Surname:  First name:

Country of donor:  Country of tx:  Tx-center:

Local hospital:  Relation to recipients:

ABO blood group:  Height ≥  <  cm Body weight ≥  <  kg

Donor number	Person number	Date of donation	Surname	First name	Country of donor	Country of tx	Tx-center	Local hospital
923		23-Jun-2016		Sort Ascending				first name: N.

923		16-Jun-2016	Name:	First name: K.				
923		16-Jun-2016	Name:	First name: A.				

'Thorax registry follow up' CO diff. and O<sub>2</sub> has been shifted around

**Minor change in 'Thorax follow up'**

In thorax registry follow up -> Graft function -> 'Graft function lung' 'CO diffusion' and 'O<sub>2</sub> at rest' has been shifted around.

Graft function lung

FEV1:  |  % predicted

Vital capacity:  |  % predicted

CO diffusion:  % predicted

O<sub>2</sub> req. at rest:  /min

Possibility to specify required organs for waiting list 'Other'  
For patients listed on waiting list 'Other' you are now able to specify which other organs the patient is currently waiting for.

---

**'Other' waiting list  
(Intestine/multivisceral)**

---

Date of entry: 10-Feb-2016

Date of last urgency: 10-Feb-2016

Treatment/dialysis center: [dropdown]

Date of last change of Immunization: 16-May-2016

Specific data [Infection serology] [Urgency History] [Termination]

Primary diagnosis: SBS: Short bowel syndrome

Old diagnosis: [text]

Other Waitinglist

Stomach:  Pancreas:  Small intestine:  Large bowel:

Liver:  Spleen:  Kidney:  Other:

## Update - Information on urgent heart, lung and liver patients by SMS and email

---

***New solution is continuously being adjusted***

---

Death registrations/updates in other parts of the system has caused some trouble, so information on withdrawal on not currently active patients (previously urgent) have been sent out. We apologies for this.

We have been working thoroughly with solving these rather complex problems and hope to have done so in the resent update.

Thank you for the feedback which we have received.

***Keep in mind that we are still developing the solution, so please be patient and keep your current fax solutions running parallel until further notice.***
