- 3 Search for suitable kidney recipient and urgent waiting lists

All recipients – patient and waiting list administration

One of the most essential parts of Scandiatransplant is ready for test by users from Monday 16th of March. This first user test will run for 14 days until Friday 27th of March.

**All recipients
Ready for test
16th of March 2015**

This module covers

- registration of patient information
- waiting list administration (entry/active/on hold/withdrawal)
- STAMP/LAMP

Test point: <https://sc37.scandiatransplant.org/sctpTest/>

The test version is a 'sandbox' with anonymized data, thus you can look around and register what you like without affecting real data.

The administration module 'All recipients' will be available from the main menu 'Recipient'.

A manual, which describes how to use the module, is available at: http://www.scandiatransplant.org/organ-allocation/All_recipients_11mar2015.pdf

The manual does not describe the usage of STAMP/LAMP this will be presented in a separate manual, coming soon.

The screenshot shows a web-based form titled 'Recipient information'. The form contains several fields for patient data: Scandia Number (950231), Date of Birth (02-Jan-2012), Person Number (020112), Nationality (DK: Denmark), Surname (test), First Name (test), Transplantation History (KI; LI; PA; IT; HE; LU;), Survival Status (ALIVE), Waiting list status, Waiting list type, Urgency, First regist. (IDW, 13-Mar-2015), and Latest regist. (IDW, 13-Mar-2015). Below these fields is a tabbed interface with tabs for 'Basic info', 'Clinical data', 'Address/Phone', 'Waiting List', 'HLA Typing', 'Antibody Screen Test', 'Acceptable Antibodies', 'Previous Mismatches', and 'Death'. The 'Basic info' tab is active, showing fields for ABO Blood Group (AB), Transplant center (AR: Aarhus), Rhesus, and Department. There is also a 'Notes on Patient' field at the bottom.

We encourage all of you to access the test-point within the next 14 days to try out the new patient and waiting list administration module.

Please do not hesitate to send us any feedback you might have and contact us if you have problems with login/navigating.

***'Urgent waiting lists'
and
'Search for suitable
kidney patient'
Were implemented
2nd of March 2015***

Search for suitable kidney recipient and urgent waiting lists

Both modules were released in production 2nd of March 2015 on <https://sc37.scandiatransplant.org>

The shortcut from the 'search result list' to view detailed information on each patient is 'read only' in production, however on the test server the waiting list administration module is writeable.

Access through the old user interface is still kept open, which gives all users the opportunity to do searches and look-ups parallel and along the way learn how to use the new user interface.
