Select who to send too

Organ offers, send to others (EU)

The functionality to send to other exchange organisations outside ScandiTransplant has been modified, so that you don't have to send to all at the same time.

From a list of values you select the countries/organisations that you wish to send to, you can select one or more values.

If you later in the processor wish to send the offer to another country/organisation you go in and change the list of receivers in the 'send to other (EU)' list and send the offer again.

Info. on potential donor accessible to other countries

Sometimes during the deceased donor evaluation process, the donor center are in contact with other recipient centers to offer paybacks, spare organ etc. However, the recipient center cannot see/access a potential donor from another center.

With this update a new 'Visible to other countries' field has been introduced. The field is only available on potential donors and will be set default to 'No' when saving data.

Potential donors visible during evaluation process

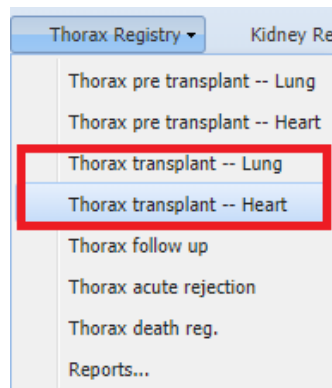

If you change the field to 'Yes', the donor will be visible to all countries for 1 week.

Thorax registry, separate transplantation data entry for heart and lung patients

The Scandi transplant Heart and Lung Group (SHLG) has decided that the thorax registry needs a major revision. One of the key points is that data entry on heart and lung will be separated in two.

Today the second part of this revision is introduced in the Thorax Registry -> Transplant, where heart and lung have been separated in two menu entries.

Thorax registry
Next step in the
revision process

Furthermore, the heart transplantation form has been updated according to what has been decided by SHLG.

It strives to be in line with the registration form – found [here](#).
