Death causes - New code list

New deceased donor death causes

At the representatives meeting May 2017 it was decided to change the deceased donor death causes as suggested by the 'Scandiatransplant Working Group on Deceased Donor Causes of Death Coding System'.

The new code list has been added today, with a new field in the database and it is obligatory to fill in. The 'old cause of death' have been mapped into the new causes and are displayed as read-only information.

The screenshot shows a web-based form for donor registration. The 'Cause of death' dropdown menu is highlighted with a green box, showing the selected option '99: Other causes of death'. Other fields include 'Procuring center: TA: Tartu', 'Original donor hosp.: 302: Pärnu Hospital', 'ABO blood group: 0', 'Rhesus D: POS', 'Weight: kg', 'Height: cm', 'BMI: kg/m²', 'Old cause of death: 20: Trauma - Car', 'Date of death', 'Notes on death: Test Test test Test Test Test', 'Donation realized: Y: Yes', 'A: Actual donor', 'Date of (no) donation: 07-Mar-2017', 'Time: 00:00', 'Intensive care unit (ICU)', 'Date of admission: 30-Aug-2015', 'Start of Ventilator Treatment: 30-Aug-2015', 'Time: 18:00', 'First regist.: OPSSEEVAM', '04-Jan-2013', 'Latest regist.: IDW', '11-Sep-2017'.

Along with the new cause list follows some explanatory notes, which should be a help in selecting the right cause.

The list is available on the homepage:

<http://www.scandiatransplant.org/data/CodingSystemforCauseofDeath.pdf>

New web address for test/learning

New Test point: <https://sc40.scandiatransplant.org/sandbox>

Sandbox as Test/learning point

The test version is a 'sandbox' with anonymized data, thus you can look around and register what you like without affecting real data. You can use this test version, if you wish to get familiar with the system.

Web addresses for test and production
