1. Find the menu 'Deceased donor'

Donor -> Deceased donors

The screenshot shows a web application interface for managing deceased donors. At the top, there is a navigation menu with options: Misc, Reports, Donor, Recipient, Liver Registry, Thorax Registry, and Kidney Registry. The 'Donor' menu is highlighted with a red circle, and its sub-menu is also highlighted with a red circle. The sub-menu options are: Deceased donors, Liver rotation, Lung rotation, Heart rotation, and Pancreas rotation. The main interface displays search parameters for deceased donors, including fields for Donor number, Hospitalized number, AB0 blood group, Donation after circ. death, Donor name, Realized, Offered, and Donor status. A table at the bottom shows a list of donors with columns for Donor number, Person number, Sex, Hospitalized, Procuring center, Responsible, Date of (no) donation, Donor name, Realized, Offered, and Donor status. The page is displaying 1 - 25 of 12649 records.

2. Find an existing donor in the database

When you enter the menu 'Deceased donor' you get a variety of possibilities for entering search parameters. You can search without entering any parameters, search on one parameter or combine more parameters to limit the number of recipients.

Example of a search based on a combination of parameters:

The screenshot shows a web interface for searching deceased donors. The search filters are as follows:

- Donor number: []
- Hospitalized in: DK: Denmark
- ABO blood group: AB
- Donation after circ. death: []
- Donor name: []
- Realized: []
- Person number: []
- Citizenship of: []
- Rhesus D: []
- Date of (no) donation: []
- Sex: []
- Procuring center: []
- Offered: []
- Donor status: []

The results table below shows the following data:

You are able to see all donors from your own country and donors from which you have received organs. Donors from other countries, from whom you have not received organs, can only be seen within 6 months after date of donation.

At the bottom of the page, the total number of donors fulfilling the search parameters are displayed (No. 1). Furthermore, the order of the list is displayed (No. 2), if you wish to change the order click on the column headers (No. 3).

Start entering information.

Mandatory data to fill in before getting a donor number is: Date of birth/age, procuring center, original donor hospital, sex, ABO blood group, Donation after, cause of death and donation realized.

The *person number* will be validated according to the registered nationality and national rules. Furthermore, it will be checked if the donor has been registered previously in the database.

Donation realized can initially be set to 'Potential' and later changed to Yes or No. To register organ procurement this field must be set to Yes.

Age in years at donation is automatically calculated based on person number and donation date.

5. Registration of organ offer information

1. Choose if the organ offer should be send internal Scandiatransplant (Send to SCTP), out of Scandiatransplant (send to others) or both.

If you at first wish to send the offer to Scandiatransplant and then find out later on that the offer can be send to external organisations, you just alter ✓ from 'send to SCTP' to 'send to others' and press save.

2. Select the organs you wish to offer

3. Fill in the rest of the information

Press save before continuing.
