User manual
Transplantation registration
(20nov2017)

Contents
1. Find the menu ‘Transplantation’ ................................................................. 1
2. Registration of a transplantation ................................................................. 2
3. HLA typing – Organ ................................................................................. 4
4. HLA match grade ...................................................................................... 4

1. Find the menu ‘Transplantation’

Recipient -> Transplantation
2. Registration of a transplantation

When you enter the menu, you get a variety of possibilities for entering search parameters. You can search on one parameter or combine more parameters to limited the number of recipients. When you find the specific patient click on it

Start by clicking on the field ‘organ’
A listing of all relevant available grafts will appear. Only organs exported to your own center will be displayed.

Click on the donor (and graft type) from which the recipient has received the organ.

Donor data will be transferred (red box), transplantation date must be filled in (green box) and other information can be filled in (blue box).
3. HLA typing – Organ

The donor HLA typing is transferred to the ‘Organ HLA’, but only one time. If alterations are done to the donor HLA typing the ‘Organ HLA’ typing on all organs used at own center must also be updated.

4. HLA match grade

In the last tab donor HLA is compared with recipient HLA and incompatible, number of mismatches and shared antigens are listed.
