

## **Yearly Report, June 2020, EVOLVD, OCT substudy**

### **Scientific Progress:**

1. Inclusion of patients in Aarhus started 01.09.19. Eight patients have been included, randomized and examined with OCT.

2. Inclusion of patients started in Oslo May, 2019. In Oslo 19 patients have been included. All patients have had OCT done.

The inclusion rate is as expected. The number of transplants went down in Oslo during the COVID19 pandemic. Gothenburg are ready to start up now and will hopefully be able to include the first patients here in June. They are planning on participation in the OCT substudy.

### **Financial status:**

So far no invoices have been paid, so the total sum of money has not been changed. I will ask the departments of Oslo and Aarhus to send the invoices as soon as possible.

Yours Sincerely

Hans Eiskjær
